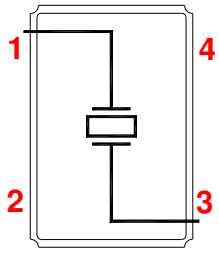
Connection (top view):



Pad 2 and Pad 4 are common and connected to the metal cover. They are not connected to the crystal. Connected to ground is recommended

The crystal is symmetrical, there is no Pad 1 preference. The part can be rotated 180° when being assembled on the PCB and will still perform correctly.

Marking:

- P = Pletronics

- *ymd or ym* = Year Month Day or Year Month, see code below
- *z* = Internal information
- Orientation of marking may be mixed on the tape
- Traceability of part is lost once removed from reel
