

- Snap Mount
- Large Capacitance
- High CV
- High Ripple
- +85°C Maximum Temperature

The SMH series capacitors are the standard 85°C, large capacitance, snap-in capacitors from United Chemi-Con. The load life for the SMH series is 2,000 hours at 85°C with the rated ripple current applied. The very high CV values and ripple current capabilities make these capacitors ideal for use in power supply filter circuits. The standard mounting style for the SMH series is a snap-in, 2-terminal configuration. Alternate 3, 4, and 5 pin terminal styles are available upon request.

The standard SMH capacitors are non-solvent proof and are not recommended when halogenated cleaning solvents are used. Refer to the Mini-Glossary for recommended cleaning conditions.
